

THE REAL FLOWER CO

Spring Planting Box

Dahlia Tuber Planting Instructions (Akita or White Star)

Plant from March to May, in a sunny position, around 15cm deep, 50-60cm apart.
The tuber will produce flowers from June to October and grow to a height of 80cm.
Start off in pots or trays, and transfer to the ground (if you want to) once the danger of frost has passed.
Fertilise every 4-5 weeks during the growing season.

Ranunculus Claw Planting Instructions

Plant from February to May, in a sunny position, around 5cm deep, 5-10cm apart.
The claw will produce flowers from May to July and grow to a height of 30cm.
Keep the soil moist and feed with general fertiliser every 4-5 weeks during the growing season.
Before planting, soak the tubers in water for about 2 hours.
Plant the claw like roots pointing downwards, into moist soil.
Regular watering is essential once in the ground.
Once flowering finishes, leave tubers undisturbed for the following year.

Sweet Pea Seeds

- Bushy annual climber with fragrant flowers.
Height between 90 to 150cm, placement dependant.
This is an intermediate height Sweet Pea suitable for smaller spaces.
South or East facing, a fully sunny spot is preferred.
Sow January to March under glass, or April-May outdoors.
Feed the plants when the first signs of flower buds appear.
Deadhead blooms regularly to prolong flowering season.

Happy planting!

From,

Rosebie and all at The Real Flower Company
